

## CA-5GLOWPASS

The 5G Low pass filter is designed to remove interference caused by new 5G and LTE signals. This allows you to enjoy a more stable viewing experience on your TV.

Note: Features and specifications are subject to change without notice.

### FEATURES

#### 4K SIGNAL

Great for streaming 4K signals from your HD antenna, the 5G Low Pass is a high quality passive filter designed to work with any HD resolution.

#### NO INTERFERENCE

Designed to remove interference caused by new 5G and LTE signals. This allows you to enjoy a more stable viewing experience on your TV.

#### SIMPLE SETUP

Easy to install, automatically filters out the effects of the 5G frequencies. Place the filter inline between your antenna and TV, then notice the difference.

#### CITY USE

The 5G filter is designed to cut out excess interference in cities where antennas are subject to lots of signal interference. Providing crystal clear picture.
