

# UNDERGLOW™

LED ACCENT LIGHTING SYSTEM

## ABOUT UNDERGLOW™

**Underglow™** is an innovative lighting solution that uses LED strips to provide brilliant accent lighting to your favorite rooms in the house. This handout covers setting up the starter kit, how to use the clip connector, and all the accessories currently available for Underglow.

## SETTING UP YOUR STARTER KIT

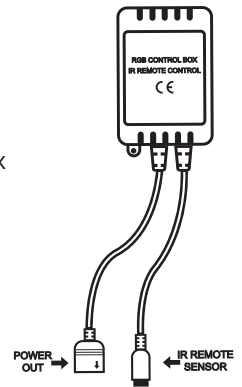

With **Underglow™** Starter Packs (UG-80) and Accessories (UGA) you can line doorways, walkways, bathrooms, cabinets, decks, patios and more.

### STEP 1) CONNECTING POWER

The **Underglow™** Power Supply can connect up to 10 LED Strips, (with the use of **Underglow™** Expansion Kits) per power supply. Each Starter Kit has 4 LED Strips, 1 Power Supply with IR Sensor, and 1 Remote.

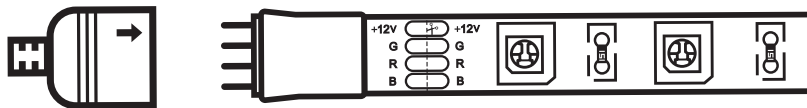

To connect power to **Underglow™**, connect the provided AC adapter to the control box (pictured right).

**ATTENTION! IR REMOTE SENSOR MUST BE VISIBLE FOR REMOTE CONTROL**  
**ATTENTION! DISCONNECT POWER WHEN ADDING & REMOVING STRIPS**

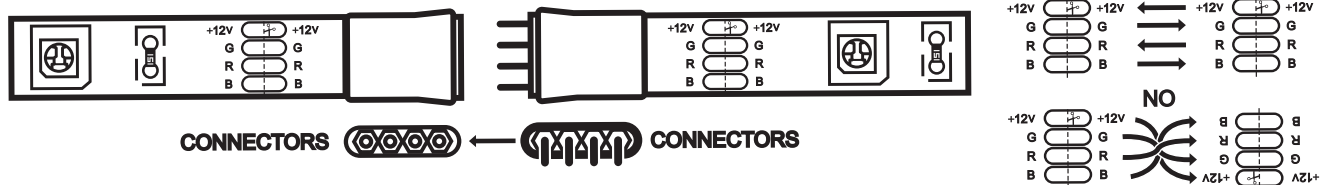

### STEP 2) CONNECTING LED STRIPS TO CONTROL BOX

To connect LED strips to the Control Box, align the arrow on the “Power Out” cable to the top of the LED strip, marked “+12V”. (Pictured Below)

### STEP 3) CONNECTING MULTIPLE STRIPS

To connect multiple LED strips, be sure to align leads with their corresponding symbols on the connecting strip. (Pictured Below)

### STEP 4) INSTALLING UNDERGLOW™

Once you have identified where to install Underglow™ clean the surface before applying the adhesive. Then Peel, Stick & Enjoy!
